

The purpose of "The Gig Club" is to significantly reduce the costs of home consumption by connecting consumers with manufacturers directly.

The consumers united under "The Gig Club" constitute purchasing power and serve as a consumer protection mechanism.

We allow manufacturers to present their products on the site and get to know their customers up close. Unlike other sites, there is no obstacle on the part of the site to continue the acquaintance that the manufacturer made with the consumer through us, in order to continue the price reduction by buying directly.

Disclaimer:

Despite the above, these should not be considered as any kind of commitment and the consumer does not and will not have any grounds for a claim against the website and its owners. Everything stated here is based on Best Aport.

The GIG Currency

"The gig" is a token issued by the club and its purpose is twofold, a. discount b. Acquaintance between the consumer and the producer, also anonymous. Manufacturers give significant discounts to those who buy from them directly, preferring to give the discount through a refund in kind rather than a price reduction in order not to damage the image of the product. Manufacturers who want to get to know the anonymous customers who purchase their products on the free market, insert gig vouchers into the product package (physical or electronic) and when the consumer redeems the voucher, his identity is revealed (in accordance with confidentiality) to the manufacturer.

Exploiting the Musings

The GIGs are accumulated in the digital wallet of the club members and are used as payment for the purchase of products on the site or in businesses that honor gigs. It should be noted that for each and every product there may be a limit on the amount of the minimum amount to be paid in cash.
